Wednesday, October 10, 2018
6:30 – 9:30 p.m.

Capital Grille, 250 Boylston Street, Chestnut Hill, MA

Agenda

- 6:30 – Network Reception
- 7:30 - Welcome and Introductions
- 7:45 - Treating Obesity, Understanding Pathophysiology of T2DM and Controlling Hunger - Martin Abrahamson, MD
- 8:05 - Improving Glucose Metabolism before and after Metabolic Surgery - Samar Hafida, MD
- 8:25 - Metabolic Surgery and New ADA Guidelines - Daniel Jones, MD
- 8:45 - Panel Discussion – Q&A

Target Audience

This activity is designed to meet the educational needs of Primary Care Physicians and Endocrinologists who regularly are asked to treat and manage overweight and obese

Activity Goal

This activity is designed to address the following core and team competencies: *Patient Care and Medical Knowledge.*

Learning Objectives

- Discuss the weight-independent mechanisms mediating remission of type 2 diabetes after selected types of bariatric/metabolic surgery.
- Describe recent Level 1 evidence from randomized clinical trials directly comparing surgical vs. non-surgical approaches to diabetes care, including among patients with a baseline BMI <35 kg/m².
- Identify new policy changes from the 2nd Diabetes Surgery Summit and the American Diabetes Association advocating consideration of metabolic surgery to treat patients with inadequately controlled type 2 diabetes and a BMI as low as 30 kg/m², or 27.5 kg/m² for Asians.

Accreditation

In support of improving patient care, Ciné-Med is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the health-care team.

Ciné-Med designates this live activity for a maximum of 2 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Overview

This evening dinner symposium will discuss research on mechanisms of action of metabolic surgery and their RCTs, which explain where such operations fit in the overall treatment algorithm for type 2 diabetes & obesity. It will also cover how new data from those RCTs has led to policy changes pertaining to surgery that are evolving based recommendations from the Diabetes Surgery Summit 2 (DSS-2) consensus conference.

Course Director

Daniel B. Jones, MD
Professor of Surgery
Harvard Medical School
Chief, Division of Minimally Invasive and Bariatric Surgery
Beth Israel Deaconess Medical Center

Guest Speaker

Martin Abrahamson, MD
Associate Professor of Medicine
Harvard Medical School
Director of Division of Continuing Medical Education
Department of Medicine, BIDMC

Guest Speaker

Samar Hafida, MD
Harvard Medical School
Endocrinologist
Joslin Diabetes Center

This activity is supported by an educational grant from Medtronic.
